

## CRUSHED SOLAR SALT SPECIFICATION

### Description

Clipper Salt is naturally evaporated heavy crushed coarse grain solar salt (sodium chloride). It has an average particle size of approx. 7-10mm. It is produced by natural solar evaporation of seawater and is harvested and washed before packing. It is used in refrigerant brines onboard commercial fishing vessels.

### Packaging and Labeling

Packed and sealed in white woven polypropylene bags without liner.

### Palletizing

Packed on wooden pallets.

### Grain Size

It has an average particle size of approx. 7mm  
The acceptable range is from 1mm through 10mm

### Chemical Profile

### Specification

Sodium Chloride Purity (% NaCl min dry basis)	98% Min
Moisture (% max)	3% Max
Insoluble Matter (% max)	0.10% Max
Magnesium (mg/kg max)	600 Max
Calcium (mg/kg max)	1200 Max
Sulphate (mg/kg max)	3000 Max
Iron (mg/kg max)	10 Max
